

Base Design - Vanilla Sketch

Control Display

Reactive Display

- users navigate screens from home using buttons
- Buttons correspond to the above "At a Glance" View
- "Your Bank" proceeds to info screen

- arrows: increase total value or coin type count

- total amount and coin type reactive to one another

- coin type determined by highest available

- Max of 10 entries available
- (+) unavailable at 10 entries

- goal progress reactive to total amount
- 5 goals available

Pin Code

<	Enter Pin				>
	^	^	^	^	
	1	4	6	0	
	v	v	v	v	

design 1

<	Enter Pin				>
	1 4 6 0				
	1	2	3		
	4	5	6		
	7	8	9		
	←	0			

design 2

- arrows to select numbers 0-9
- back arrow to lock screen
- unlock arrow shows up for correct code
- keypad style
- ← deletes number

Keyboard

<	Enter Name																>	
	Bike																	
	a	b	c	d	e	f	g	h	i									
	j	k	l	m	n	o	p	q	r									
←	s	t	u	v	w	x	y	z	↑									

- ↑ change letter case
- arrows to cancel and enter
- ← deletes character

Design Alternatives

- Enter and Back buttons instead of < >
- ≡ Menu button to navigate screens
- unlock button instead of swipe up action
- alternative capacity graphic
- arrows to scroll up down instead of scrollbar

Hybrid Sketch

Display Implementation: Level 0

← Device UI
primary display
(touchscreen)

← Testing UI

- device UI reacts
to testing UI
to simulate coin
insertions

- primary display
also capable of
testing UI

- secondary display
is purely reactive

← Device UI
Secondary display
(not touchscreen)
